## The World Runs on Gates.

**Gates is the global leader in timing belt innovation. Gates global network of technical research and development centers work with virtually every Original Equipment Manufacturer worldwide to build timing belts for new vehicles as they're being designed. It is this strong Original Equipment (OE) relationship that enables us to develop timing system products for the Aftermarket that meet or exceed OE performance specifications.**

**Install the original. Install Gates.**

### UNITTA is Gates in Asia

Gates Unitta Asia Company conducts business throughout all Asian countries and is an OE parts supplier to vehicle manufacturers as well as the Automotive Aftermarket. This global network of design, development and manufacturing capabilities is unmatched by any competitor for both OE and Aftermarket products.

# No One Comes Close to Gates.

**Today, Gates is the world's largest manufacturer of Timing Belts and Timing Component Kits (TCKs). Import or Domestic, if there is a car in the U.S. with a timing belt in it, we have the replacement part for it. As the OE or OES supplier for virtual every vehicle manufacturer worldwide, you can be confident every time you install Gates. Restore your customers' drive system to factory original condition with Gates Timing Belts and Timing Component Kits.**

## Timing Belts

**Gates timing belts are OE-equivalent or better in service life and performance.**

- Aramid reinforced nylon jackets and back side jackets for longer wear.
- High grade HNBR rubber for superior heat and contamination resistance.
- Premium high strength tensile members.
- Unlike some competitors, Gates does not substitute inferior belt constructions for premium constructions specified by the OEM on any application.
- Most extensive coverage in the industry. Import or Domestic.

## Timing Component Kits

**Why take a chance? With Gates TCKs, you can avoid warranties and comebacks by replacing all critical system components at the same time.**

- Popular kits covering over 31 million import applications include actual Original Equipment Tensioners and Idlers.
- Total solution for any application, including Belts, Idler(s), Tensioners and supporting hardware with detailed installation instruction.
- Great convenience. Ease of part sourcing. Reduced customer comebacks.

## Timing Component Kits with Water Pump

**Our Timing Component Kits with Water Pump offer the same OE components as our TCKs with the addition of a water pump. Timing belt driven water pumps should always be replaced when the timing belt is replaced.**

- Includes a warranty equal to the OE replacement interval.
- Water Pumps are designed and built for long lasting, efficient cooling.
- Hydraulic tensioners included where available.
- Great convenience. Ease of part sourcing. Reduced customer comebacks.

## Hydraulic Tensioners

**For applications with high loads and/or angular vibrations, where a mechanical automatic tensioner can not provide sufficient damping or tensioner movement.**

- 100% OE parts.
- Market-leading application coverage.
- Gates tensioner pin set tool (PN#91010) for securing piston.

## PowerGrip® Individual Timing Components

**Gates PowerGrip® timing components for those who want to replace individual parts.**

- Components include automatic, manual and hydraulic tensioners and idler pulleys.
- Only "OE" components for the most popular and problematic applications.

## **WARNING**

Be safe! Do not use Gates belts, pulleys or sprockets on any aircraft propeller or rotor drive systems or in-flight accessory drives. Those Gates products are not designed or intended for aircraft use.

## **CAUTION**

Use Gates products only on applications specified in Gates literature. Install and maintain products according to the vehicle manufacturer's recommended procedures and with the recommended tools. Failure to follow these instructions could result in injury or property damage. Gates Corporation disclaims all liability due to failure to follow these instructions.

## **LIMITED WARRANTY FOR THE LIFE OF THE MERCHANDISE**

Timing belts are a critical part of any engine maintenance program and must be replaced at the specified interval determined by the belt manufacturer or original equipment vehicle manufacturer. Failure to do so may result in catastrophic engine damage. Replacement with a premium quality belt that meets or exceeds original equipment specifications is your best assurance of continued trouble-free performance. Gates Corporation is the world's leading designer and manufacturer of timing belts. Gates belts not only meet OE specifications, they are an exact OE replacement on many vehicles.

All Gates timing belts are manufactured under tight quality controls. In the event of failure due to defects in materials or workmanship, however, Gates will replace timing belts that are proven to be defective if failure occurred within the timing belt replacement interval recommendation specified by Gates or the original equipment vehicle manufacturer. (See [www.gates.com/tb](http://www.gates.com/tb) for required replacement intervals.) Gates will also, at its option, repair or replace vehicle engine components damaged due to proven defects in timing belt materials or workmanship, if the damage occurred within the specified belt replacement interval. Repairs or replacement costs will not exceed the fair market value of vehicle at the time the defect was identified. This paragraph states the exclusive remedy for defects in Gates timing belts.

This warranty is null and void if the belt is not used in the application as defined in Gates printed or online applications catalog. Gates timing belts must be installed, tensioned and maintained according to the vehicle manufacturer's recommended procedures using OE recommended tools or their equivalent. Failure to follow these instructions will void the warranty. Warranty claims will be denied if, in the sole determination of Gates, the belt has been damaged due to any of the following conditions: collision, engine overheating, engine oil starvation, belt misapplication, belt contamination with oil or antifreeze, misinstallation, over or under-tensioning or other abuse. This warranty does not apply to vehicles or engines used in modified performance or racing applications.

**THERE IS NO OTHER EXPRESS WARRANTY. THIS IS THE EXCLUSIVE WARRANTY STATEMENT. THERE ARE NO IMPLIED WARRANTIES, INCLUDING THOSE OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, COURSE OF DEALING OR USAGE OF TRADE. LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES UNDER ANY AND ALL WARRANTIES ARE EXCLUDED TO THE EXTENT EXCLUSION IS PERMITTED BY LAW. SOME STATES, PROVINCES AND OTHER POLITICAL SUBDIVISIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES AND SOME DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION AND EXCLUSION MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS AND YOU MAY ALSO HAVE OTHER RIGHTS, DEPENDING UPON WHERE YOU LIVE OR USE THE TIMING BELT.**

For warranty service, please contact the local automotive parts store that sold the belt. The parts store will contact a Gates representative to implement the warranty process.

## NOTE

Recommended replacement interval information was compiled by Gates from vehicle manufacturers' information where available. In the cases where vehicle manufacturers' recommended replacement intervals are not available, intervals shown are based on industry standards.

Replacement intervals are *recommendations only* and are based on average vehicle operations under normal conditions. Belts may fail sooner, or last longer, depending on a variety of factors, including driving and temperature conditions. Gates assumes no responsibility whatsoever, for any errors or omissions in the information.

★ Interference Engine Application.

# Free Running or Interference Engine? You and Your Customers Need to Know.

Automobile engines can be classified as either Free-Running or Interference, depending on what occurs if piston/valve synchronization is lost.

As illustrated below, in the free-running engine with the crankshaft still moving, there is enough clearance between the valve and piston, even if the cam stops with a valve fully open.

However, interference engines usually sustain damage if synchronization is lost. As illustrated, disrupted synchronization allows the piston and valve to collide causing damage and very expensive repairs for the vehicle owner. Damage can occur to valves, pistons, or heads, and in some cases, completely ruin the engine. Most import (with higher compression engines) and most car and light truck diesel engines are interference. To avoid costly engine repairs, follow the auto manufacturers' mileage replacement recommendations or we recommend timing belt replacement at around 60,000 miles.

**NOTE:** For your convenience, interference engines have been footnoted with a star in the application listings of this publication. This lets you easily identify them, and pass that information on to your customers.

Since timing belts are inside the engine they tend to be an out-of-sight, out-of-mind item and are seldom thought of as a part of routine maintenance. Here are some questions to ask customers that will help sell belts and protect the customer from expensive repairs:

1. Did you buy the car new? If yes, they'll know if the belt has ever been replaced.
2. Did you buy the car used? If so, they won't know if the belt has been replaced. This is a flag for the customer to get the belt checked, replaced or at least be aware that he has a timing belt.
3. How many miles are on the vehicle? Generally belts should be replaced at around 60,000 miles or less. Our Timing Belt Replacement Recommendations Booklet is an excellent tool for determining replacement intervals.
4. Have you ever replaced the timing belt? If the answer is yes or no (and the customer knows the mileage) you can determine where the vehicle is in the replacement cycle.

Here's a helpful hint for customers with vehicles within a few thousand miles of the recommended replacement interval. If they are having any engine repair done, have the timing belt checked. If it needs replacing, do it along with the other repairs and save time and money.
